SUMMARY

Web developer with extensive experience who excels in integrating front-end tools like React, Next.js, and web3 into Solidity-based applications. Adept at all phases of web development, including design, installation, testing, and system maintenance. Very proficient in testing and debugging procedures as well as user interface design.

Developed my abilities in creating decentralized apps and incorporating smart contracts using Solidity and Web3. I'm passionate about examining the possibilities of Blockchain Technology and its practical applications. As a Blockchain Developer, successfully constructed my own NFT Marketplace, demonstrating my experience in the creation of NFT (Non-Fungible Token) markets.

I thrive in collaborative team settings as well as handling single tasks since I am self-motivated. I am committed to developing unique and user-friendly online experiences, especially in the fascinating spheres of NFTs and blockchain technologies, and I have a sharp eye for detail and a dedication to providing high-quality solutions.

I'm excited to use my expertise in frontend development and blockchain knowledge to contribute to cutting-edge initiatives that will revolutionize the digital environment with NFTs and explore fresh prospects in the Marketplace industry, which is continuously changing.

PROFESSIONAL SKILLS

Frontend Developer | Blockchain Developer | React | Redux | Next.js | JavaScript | TypeScript | Bootstrap | Tailwind | Chakra UI | Material UI | Solidity | Web3.js | Ether.js | Node.js | HTML | CSS | MySQL | Postman | DB Browser | Linux | Agile | Jira | Scrum | Kanban |

SOFT SKILLS

Leadership | Time Management | Team Management | Collaborative Working | Analytical Thinking | Organized and Adaptable | Team Member | Creative Spirit | Multitask Skills | Fast Learner | Communication & Interpersonal Skills | Leader | Emotional Intelligence & Empathy | Curiosity |

PROJECTS

Ustech LLC

Nov 2022-Present

Frontend / Blockchain Developer

With the use of HTML, CSS, JavaScript, React, and Next.js, user-friendly user interfaces for blockchain apps have been created. To write Ethereum smart contracts, one has developed a thorough grasp of the Solidity programming language. Designed and implemented a number of use cases leveraging smart contracts, including as NFTs and decentralized marketplaces. Mentored and assisted interns in understanding blockchain ideas and technology. Offered advise and help to students while they worked on their blockchain projects and homework. Conducted blockchain development training sessions and seminars for both the internal staff and outside attendees. A team of engineers and I worked together to produce dependable and secure blockchain solutions.

DappLabs

Jul 2023-Sep 2023

Frontend / Blockchain Developer

Played a crucial part in the conception and execution of the cutting-edge Web3 project "DappGate". Facilitated the usage of Wagmi (React Hook) to integrate smart contracts with user interfaces, delivering a smooth user experience. To improve and hone platform performance, I worked closely with a cross-functional team of engineers, designers, and blockchain specialists. Continuously used cutting-edge Web3 ecosystem tools and technologies to improve the project's capabilities and features. Showed a good aptitude for designing user-centric user interfaces, improving UX/UI for Web3 apps, and making sure that the blockchain and frontend components interacted consistently and effectively.

Freelance

Sep 2020-Nov 2022

Web Developer

HTML, CSS, and JavaScript were used to develop and build user interfaces for web applications. The seamless integration of frontend and backend operations was achieved through collaboration with designers and backend developers. React framework was used to create responsive and interactive components. Carried out routine code reviews and put optimizations for better performance and maintainability. I carefully collaborated with product managers to comprehend requirements and transform them into doable tasks. Helped troubleshoot and fix front end-related issues that users had reported.

EDUCATION

Ankara University

Bachelor of Law Faculty

Aug 2018

CERTIFICATES

Blockchain Developer, USTech Academy

Jul 2023

Blockchain Basics, University at Buffalo

Jun 2023

React Basics, University of Michigan

May 2023

Interactivity with Javascript, University of Michigan

Feb 2023

Advanced Styling with Responsive Design, University of Michigan

Dec 2022
